About Me

Description: I have been researching and developing projects since 2010. I have developed projects with many technologies and languages. There is no part of development that I can't handle. I used database systems such as MySQL, MongoDB, PostgreSQL, Oracle Db and Ms Sql, cassandra. I am good at development with Restful and SOA architectures. I worked on HA and Cluster architectures. I researched systems and analysis technologies such as Spark, Hadoop. Android, I developed a Fullstack project in the form of iOS, web(Angular) and Web Admin panel. Mobile clients are native and web Angular. backend - Restful (NeuMed). I have used most operating systems, Windows, Ubuntu, Linux Distributions and MacOS. I have good practice with Linux commands and ssh. System setup and I also have experience in virtualization. Apache, MySQL, php, tomcat etc. on Ubuntu. setups and ssl creation and setup I did. I used Python mostly at the scripting level. I have also researched and intend to use it in artificial intelligence and information processing. As a Full Stack Developer; I've been worked on many programming languages and frameworks. I've coded on each part of development(frontend, backend, mobile and gaming). I always track new technologies and try to make more stable and faster systems that I'm working on. Also I like developing games, make animations or 3d or 2d art drawing about them.

Experiences

Total: 9+ years

Dgpays - Senior Fullstack Developer

Duration: 4 years 7 months - Start Date: 2020/05/01 - End Date: 2024/11/30
